

Outcome Pitch Event

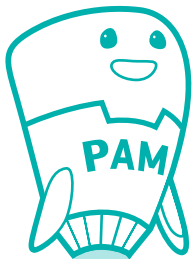

iINNOVAT!ON BAY

Innovation Bay

Innovation Bay helps founders turn their ideas into viable businesses by connecting them with investors, mentors and leaders who invest their time, knowledge, networks and money to help them reach their goals.

Opportunity

Innovation Bay Founder Dinners bring together emerging technology entrepreneurs who pitch their business to our angel investor community for funding, connections and advice over a relaxed dinner.

Program Application Management System (PAM)

Sian Priest of Innovation bay said:

"We've previously used other application systems but found them clunky and the shortlisting process difficult especially when involving multiple people. We also found Startups had a lot of technical trouble when completing forms.

Since using CoVentured we have double the number of applicants for the founder dinners.

We've had less technical issues reported by founders, and it's much easier for us to shortlist startups. It's also great that CoVentured actively shares the opportunity with their growing community."

What is PAM?

Customisable Applications

You have full control of the application questions and can design the form to fit with your brand.

Customisable Scoring Process

Set your own scoring criteria.

Unlimited Applications

Accept as many applications as your program demands.

Unlimited Evaluators

Invite as many team members and experts to evaluate applications as you need.

Send Response

Directly respond to Startups, individually or in batches.

High quality applicants

Reach a higher quality Startup community.

High completion rate

PAM pre-fills information from Startups with a CoVentured profile, meaning a faster application process.
