

Case Study

What has Floodmapp's experience been on CoVentured?

Coventured has been great! One of our first customers at FloodMapp came through Coventured, which is probably the best outcome you could get as a startup.

I have been really impressed with the level of engagement we've got from corporates on the messaging platform.

Why is CoVentured and working with Corporates important?

These companies are typically large organisations. Sometimes it can be challenging to find the right person to connect with, and Coventured provides a great avenue to be able to contact the right corporates.

The other great thing is that there is a summary profile for each organisation with their technology focus areas and challenges, so that you can identify how your startup aligns with their strategy going forward.
